

Tadeusz Rychter

Frontend Developer

tadeusz.rychter@gmail.com

Warsaw / remote work

In the past 12 months I have:

- Been solely responsible for developing frontend of a big portal – Golocal.de (200k active users, 3m PV/month, 450k reviews, 10m locations; over 1k frontend files)
- Fixed various bugs and updated code to use new Google APIs
- Created frontend for new websites using HTML5, CSS3, JavaScript, JSTL (Spring)
- Single-handedly devised an AngularJS app that strongly influenced the marketing strategy – [article](#) and [demo](#)
- Introduced an automated CSS workflow based on Gulp and PostCSS
- Architected and developed a configurable, mobile-first widget
- Integrated Selenium tests into the build server and CI with Jenkins
- Introduced testing with Selenium to other developers and laid a foundation for a domain-specific framework
- Proposed and prepared automated testing of APIs with Postman
- Conceptualised and developed processes for batch personalisation of print products (Adobe InDesign; SVG) – [article](#)
- Created various designs in Adobe Photoshop and InDesign.
- Coded responsive websites using both the Foundation framework and plain CSS
- Redesigned project's main website largely improving its performance (time to render)
- Developed a responsive newsletter template – [article](#)
- Worked with systems with various development workflows centered around Java (Gradle, Maven) using SVN and Git
- Set up virtual environments to streamline the evaluation of new software

Before that I've been self-employed for 4 years mainly designing and coding websites in WordPress and Drupal.
